**THIS IS WHERE WE
PRODUCE THE ORGANIC
GLUTEN-FREE FLOURS**

The image shows a large industrial facility, likely a refinery or chemical processing plant. The scene is dominated by large, vertical stainless steel funnels or columns, which are part of a complex piping system. These funnels are supported by a network of white structural beams. To the left, a vertical stainless steel tank is connected to the main system by various pipes and valves. A red fire extinguisher is visible on the floor near the base of the funnels. In the foreground, a large, curved stainless steel pipe runs across the floor. The background shows more industrial equipment, including a control panel with a screen and various buttons. The overall environment is clean and well-lit, with a concrete floor and a high ceiling.
