## OUR NEW GLUTEN-FREE FLOURS ORGANIC GLUTEN-FREE

| Organic | Semi-Wholemeal | Stone Ground | No Additives

### THE HOUSE OF **GLUTEN-FREE**

Antico Molino Rosso's New Production Unit, closed cycle.

A completely dedicated space where gluten-free raw materials arrive before being processed and packaged by specialized staff prepared to treat these products with extreme safety in order to guarantee total absence of contamination. A highly qualified in-house laboratory tests and certifies the total absence of gluten through strict controls, in order to offer the serenity and security the final customer deserves.

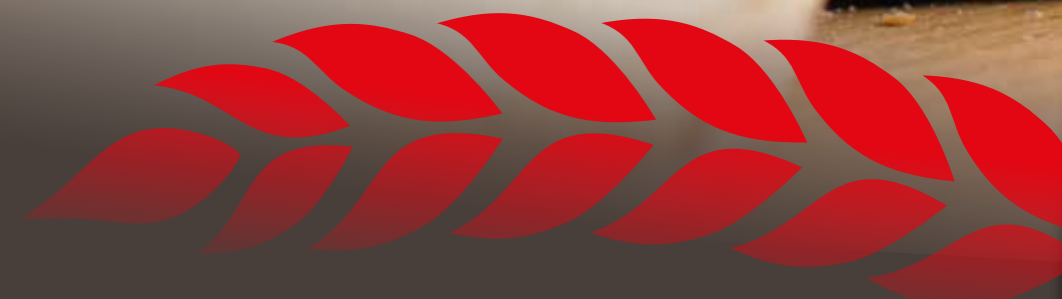

### GLUTEN-FREE FLOURS

Our SpigaBuona® flours are good, they are really good for everyone.

Simply wholegrain and semi-wholegrain, organic, stone-ground flours born from the commitment and strong desire to create a natural product suitable for everyday use. And the fact that they are gluten-free is our little secret!

SpigaBuona® is a line of gluten-free products that are excellent for the belly and heart of the whole family.

This means our flours are suitable not only for people with an intolerance to gluten and who therefore need controlled products with fewer starches (unlike products currently available on the market), but are perfect for use in the daily life at home because of their digestibility, unique flavours and varieties of tasty, easy-to-use mixes.

## CERTIFIED GLUTEN-FREE

property of CSQA that defines the requirements necessary for the "Gluten Free" certification.

The Disciplinary applies to any type of food product with a gluten content of less than 10 ppm (10 mg / kg), less than the current legal limit of 20 ppm (EC Regulation No. 41/2009), thus representing an important guarantee supplement for celiac consumers.
